

OUR IDEA EXPLAINED

Introduction

The idea of the project is to create a place for global blockchain community to facilitate knowledge and ideas sharing and networking. We are currently working on first version of the **CoinCo Platform** that will focus on blockchain events.

Ultimate goal

Our ultimate goal is creation of an unique place for all of blockchain community that will combine 3 aspects: payment (transfer of funds by credit cards or cryptocurrencies), trade (exchange of goods and services) and social (networking). We will combine a few existing solutions into one, creating a brand new quality.

ConferenceCoin

Easy blockchain sharing

Our inspiration

We are inspired and want to follow a path introduced by WeChat in China.

We want to create a new solution that may be similar to existing ones at first glance. However we have completely new and innovative approach which makes our Platform a revolution.

We want to follow that path and grant blockchain community with something completely new and innovative just as our predecessors before.

PAYMENT

TRADE

SOCIAL

Our unique combination of existing solutions will create a Platform of the future that provides its users with personalized solutions fitted to their needs.

The Platform will be a place for everyone with a vast space for growing considering a blockchain technology will be widely used in the world in the nearest future.
